

**FESCUES & OTHER GRASSES**

# Amplify Phalaris

**Deep rooted perennial tolerating waterlogging and salinity**

*Phalaris aquatica*

Amplify is a great all rounder with high winter forage yields and some summer production under favourable conditions. Can go summer dormant under adverse conditions for increased persistence. A long term perennial that has increased seedling vigour and lower toxicity. Tolerance to acid soils and heavy grazing.

## ABOUT THIS VARIETY

Phalaris has been one of Australia's success stories for temperate grasses. Australia has been the leader in Phalaris aquatica variety development and it is well suited to the southern Australian environment, being the most winter productive for forage growth out of all the temperate perennial grasses.

Amplify phalaris is a deep-rooted perennial capable of tolerating waterlogged and acidic soils. Amplify has the ability to go summer dormant under adverse conditions for increased persistence.

A long term perennial pasture that gives you increased seedling vigour and lower toxicity. Amplify is a smart choice for growers who want a reliable and high yielding long term pasture.

### QUICK FACTS

-  **TYPE & PERSISTENCY**  
Perennial
-  **MIN RAINFALL**  
500 mm+
-  **SOWING RATE**  
2–8 kg/ha Monoculture, 2–4 kg/ha In a mix
-  **TOLERANCES**  
Low pH, Waterlogging, Mild Salinity
-  **END USE**  
Grazing
-  **LIVESTOCK**  
Beef, Dairy, Sheep
-  **GROWTH SEASON**  
Winter-active / Mediterranean

### KEY ATTRIBUTES

- ✓ Tolerates waterlogged and acidic soils
- ✓ Some summer production under favourable conditions
- ✓ Increased seedling vigour and lower toxicity
- ✓ High winter forage yields
- ✓ Summer dormancy under adverse conditions for persistence
- ✓ Tolerates heavy grazing

### PLANTING & GRAZING NOTES

Phalaris is a slow to establish species and therefore should be allowed plenty of time to establish. Only very light grazing in the first year is recommended to encourage tillering but otherwise grazing should be avoided in the first year especially when phalaris is flowering as this is when dormant buds are forming for long term persistence. Use the higher sowing rate on areas with high levels of waterlogging.

### STAND LIFE

A long term perennial. Amplify has the ability to go summer dormant under adverse conditions for increased persistence.

### HOW IT'S SOLD

| FORM | PACK  |
|------|-------|
| Bare | 25 kg |
