

CLOVERS

Berseem Clover

High quality forage with excellent bulk for silage and hay

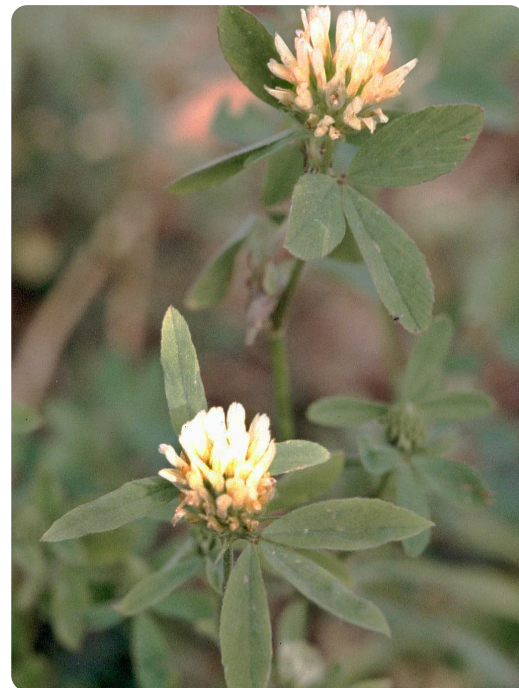

Trifolium alexandrinum

Soft seeded erect annual clover with rapid establishment vigour. Suited to medium-high rainfall areas, growing in autumn, winter and spring, and to neutral, fertile alluvial and medium to heavy soils. High quality forage and bulk for silage and hay, providing multiple cuts. Low cold tolerance and low risk of bloat.

ABOUT THIS VARIETY

Berseem Clover is a soft seeded, erect annual clover with rapid establishment vigour, growing through autumn, winter and spring in medium to high rainfall areas. It performs best on neutral, fertile alluvial and medium to heavy soils.

Berseem provides high quality forage and excellent bulk for silage and hay, with multiple cuts, and is commonly used in mixes with other legumes or annual ryegrasses.
