FORAGE & GRAIN CROPS

Coogee Field Peas

Excellent nitrogen fixation – offers multiple options

Pisum sativum

Coogee is an improved dun pea variety with rapid early growth, high biomass, basal branching, and longer vines, maturing slightly later than Parafield. It resists powdery mildew, tolerates boron and salinity, and offers flexibility for forage, stockfeed, or use as a green/brown manure or hay, depending on seasonal conditions.

QUICK FACTS

- TYPE & PERSISTENCY
  Annual
- MIN RAINFALL
  350 mm+
- SOWING RATE
  80–100 kg/ha General
- TOLERANCES
  Low pH, Salinity
- END USE
  Grazing, Hay, Stockfeed, Green manure

ABOUT THIS VARIETY

Coogee is an improved dun pea variety with rapid early growth, high biomass, basal branching and longer vines. It matures slightly later than Parafield.

Coogee gives excellent nitrogen fixation in soils and offers multiple options: forage, stockfeed, or use as a green or brown manure or hay, depending on seasonal conditions.

KEY ATTRIBUTES

- ✓ Improved dun pea with rapid early growth and high biomass
- ✓ Tolerates boron and salinity
- ✓ Matures slightly later than Parafield
- ✓ Resists powdery mildew
- ✓ Flexible: forage, stockfeed, green or brown manure, or hay

PLANTING & GRAZING NOTES

Inoculate seed with inoculant group E before sowing for effective nodulation.

DISEASE & PEST RESISTANCE

Resists powdery mildew.
