

RYEGRASSES

Evoke Tetraploid Annual Ryegrass

Establishes quickly with improved later season growth

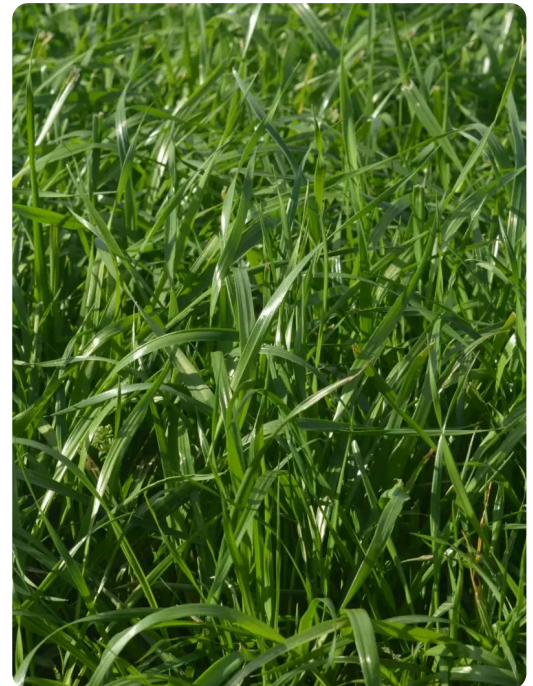

Lolium multiflorum

Evoke is a tetraploid annual Australian bred ryegrass and has been selected for improved later season growth whilst still producing high quality feed through winter and early spring. Evoke combines annual and Italian ryegrass genetics which gives this variety the ability to establish quickly, produce high quality winter feed and hold onto quality later in the season.

ABOUT THIS VARIETY

Evoke is a tetraploid annual Australian bred ryegrass that combines annual and Italian ryegrass genetics, which gives this variety the ability to establish quickly, produce high quality winter feed and hold onto quality later in the season.

Evoke has been selected for improved later season growth whilst still producing high quality feed through winter and early spring. It is a late heading variety suited to grazing, silage and hay.
