

RYEGRASSES

Finefeed Diploid Annual Ryegrass

Fast emergence, quality feed

Fast emergence, with improved rust resistance. A fine leafed grass producing excellent quality feed. Being a late flowering variety it has high winter and spring dry matter yields. As a diploid it works well mixed with Amazon T due to it being later flowering. Excellent for grazing, silage and hay. Australian bred for Australian farming conditions.

ABOUT THIS VARIETY

Finefeed is a fine leafed diploid annual ryegrass with fine palatable foliage, producing excellent quality feed with high winter and spring dry matter yields. It is excellent for grazing, silage and hay.

Selected for fast emergence and fine leafed to improve quality, with improved rust resistance over older varieties. Outstanding spring dry matter yields make it suitable for grazing, silage or hay. Late maturing high-quality feed, Australian bred, trialled and grown.

QUICK FACTS

-  **TYPE & PERSISTENCY**
Annual
-  **MIN RAINFALL**
500 mm+
-  **SOIL & PH**
Soil range: Sand to Heavy · pH 5+ (CaCl₂)
-  **SOWING RATE**
20–30 kg/ha General
-  **TOLERANCES**
Mild Low pH
-  **END USE**
Grazing, Hay, Silage
-  **PLOIDY**
Diploid
-  **HEADING DATE**
Late

KEY ATTRIBUTES

- ✓ Fine leafed to improve quality
- ✓ High winter dry matter yields
- ✓ Works well mixed with Amazon T
- ✓ Improved rust resistance over older varieties
- ✓ Outstanding spring dry matter yields for grazing, silage or hay
- ✓ Australian bred, trialled and grown

DISEASE & PEST RESISTANCE

Improved rust resistance over older varieties

STAND LIFE

Annual — single growing season
