

LUCERNE

L91 Lucerne

Improved forage production

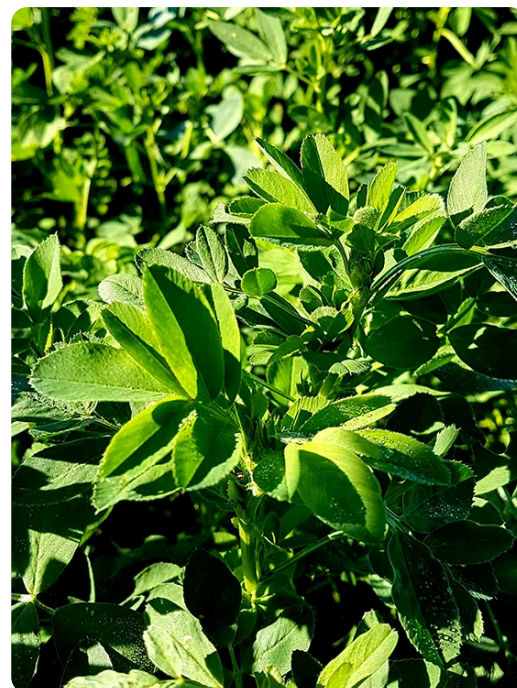

Medicago sativa

Highly winter active, with good pest and disease resistance. Prefers deep well drained soils (sands to moderately heavy clay) with a slightly acid to alkaline pH. Rotationally graze and reduce grazing pressure over summer to avoid grazing out the crown. Highly palatable and digestible and ideal for grazing, silage and hay.

ABOUT THIS VARIETY

L91 is a highly winter active lucerne (winter activity rating 9) with good pest and disease resistance. It prefers deep well drained soils (sands to moderately heavy clay) with a slightly acid to alkaline pH, and is intolerant of high levels of exchangeable aluminium and periods of waterlogging.

L91 is highly palatable and digestible and ideal for grazing, silage and hay. It is supplied as Goldstrike coated seed.

QUICK FACTS

-  **TYPE & PERSISTENCY**
Perennial
-  **MIN RAINFALL**
400 mm+
-  **SOIL & PH**
Soil range: Sand to Heavy · pH 5.5+ (CaCl₂)
-  **SOWING RATE**
4–10 kg/ha Dryland, 18–25 kg/ha Irrigation
-  **TOLERANCES**
Salinity
-  **END USE**
Grazing, Hay, Silage
-  **WINTER ACTIVITY**
9

KEY ATTRIBUTES

- ✔ Highly winter active (rating 9)
- ✔ Prefers deep well drained soils, sands to moderately heavy clay
- ✔ Ideal for grazing, silage and hay
- ✔ Good pest and disease resistance
- ✔ Highly palatable and digestible

PLANTING & GRAZING NOTES

Rotationally graze and reduce grazing pressure over summer to avoid grazing out the crown. Inoculant: group AL.

DISEASE & PEST RESISTANCE

Good pest and disease resistance.
