

CLOVERS

Nungarin Subterranean Clover

Short season variety

Trifolium subterraneum

Early maturing hard black seeded variety with very good persistence due to its high level of hard seeds. More suited to drier areas. Because it is early maturing it does not produce much feed in late spring.

ABOUT THIS VARIETY

Nungarin is an early-maturing subterranean clover, flowering early August with seed maturity in late September.

Nungarin is a hard black seeded subterranean clover variety. It is suited to drier areas because it is early maturing and does not produce much feed in late spring.

This early flowering subterranean clover is best suited to moderately acidic, well-drained soils.

QUICK FACTS

-  **TYPE & PERSISTENCY**
Annual
-  **MIN RAINFALL**
300 mm+
-  **SOIL & PH**
Soil range: Loam · pH 4.5+ (CaCl₂)
-  **SOWING RATE**
6–20 kg/ha General
-  **TOLERANCES**
Mild Low pH
-  **DAYS TO FLOWERING**
77
-  **HARD SEED LEVEL**
High

KEY ATTRIBUTES

- ✓ Early maturing, flowering early August in Perth
- ✓ High level of hard seed and good persistence
- ✓ Best suited to moderately acidic, well-drained soils
- ✓ Hard black seeded variety
- ✓ Suited to drier areas
- ✓ Does not produce much feed in late spring

PLANTING & GRAZING NOTES

Inoculate with group C inoculant before sowing.

DISEASE & PEST RESISTANCE

Highly susceptible to clover scorch (races 1 and 2).

STAND LIFE

Nungarin has a very high level of hard seed yields and good persistence.
