

HERBS

Six Point Chicory

High quality summer forage

Cichorium intybus

High quality feed and often sown in a mix of grasses and clovers at 2-5kg per hectare. Tolerant of waterlogging and drought periods, with a very deep tap root known to assist with breaking up the soil and enabling moisture to be drawn from deep within the soil profile. Can regenerate if allowed to go to seed. Parasite inhibiting properties, safe for animals and does not cause staggers.
